

Sewer capacity stopping your development?

We have the solution>>

Advanced
Wastewater Technologies

Revolutionary wastewater infrastructure

Municipal capacity no longer limits your land development opportunities. Advanced Wastewater Technologies, an alliance partner of Global Water Group, has the solution with the Environmental Wastewater Recycling Unit (EWWRU) - a patented modular wastewater system that is environmentally sound with low maintenance costs.

Frees up millions of acres in developable land

Develop land with density independent of municipality sewer systems

ZERO sludge

Patented system provides environmentally correct means that eliminates sludge

100% reusable effluent

Use for irrigation, reservoir refilling or even potable water
